Use of the Design Professional Inspection Form

Code: 2018 NC Administrative Code

Date: December 8, 2021

Section: Appendix G

Question:

Is the “Design Professional Inspection Form” for use by engineers to inspect building systems such as framing?

Answer:

No, the form is only used by engineers to inspect components and elements. Some examples of “components and elements” are a stud, a header, a truss, a foundation, a window, and a door.

The form is not intended to be used for third party inspections such as may be required by Chapter 17 of the NC Building Code or inspection of systems such as, but not limited to, framing, truss system, electrical system, plumbing system, mechanical system, and thermal envelope.
